

Marine Bird Research in Nunavut and Nunavik

Grant Gilchrist, Tony Gaston, Birgit Braune, Michael Janssen and Christie Macdonald; Environment Canada

Sam Iverson and Jennifer Provencher; Carleton University & Mark Mallory; Acadia University

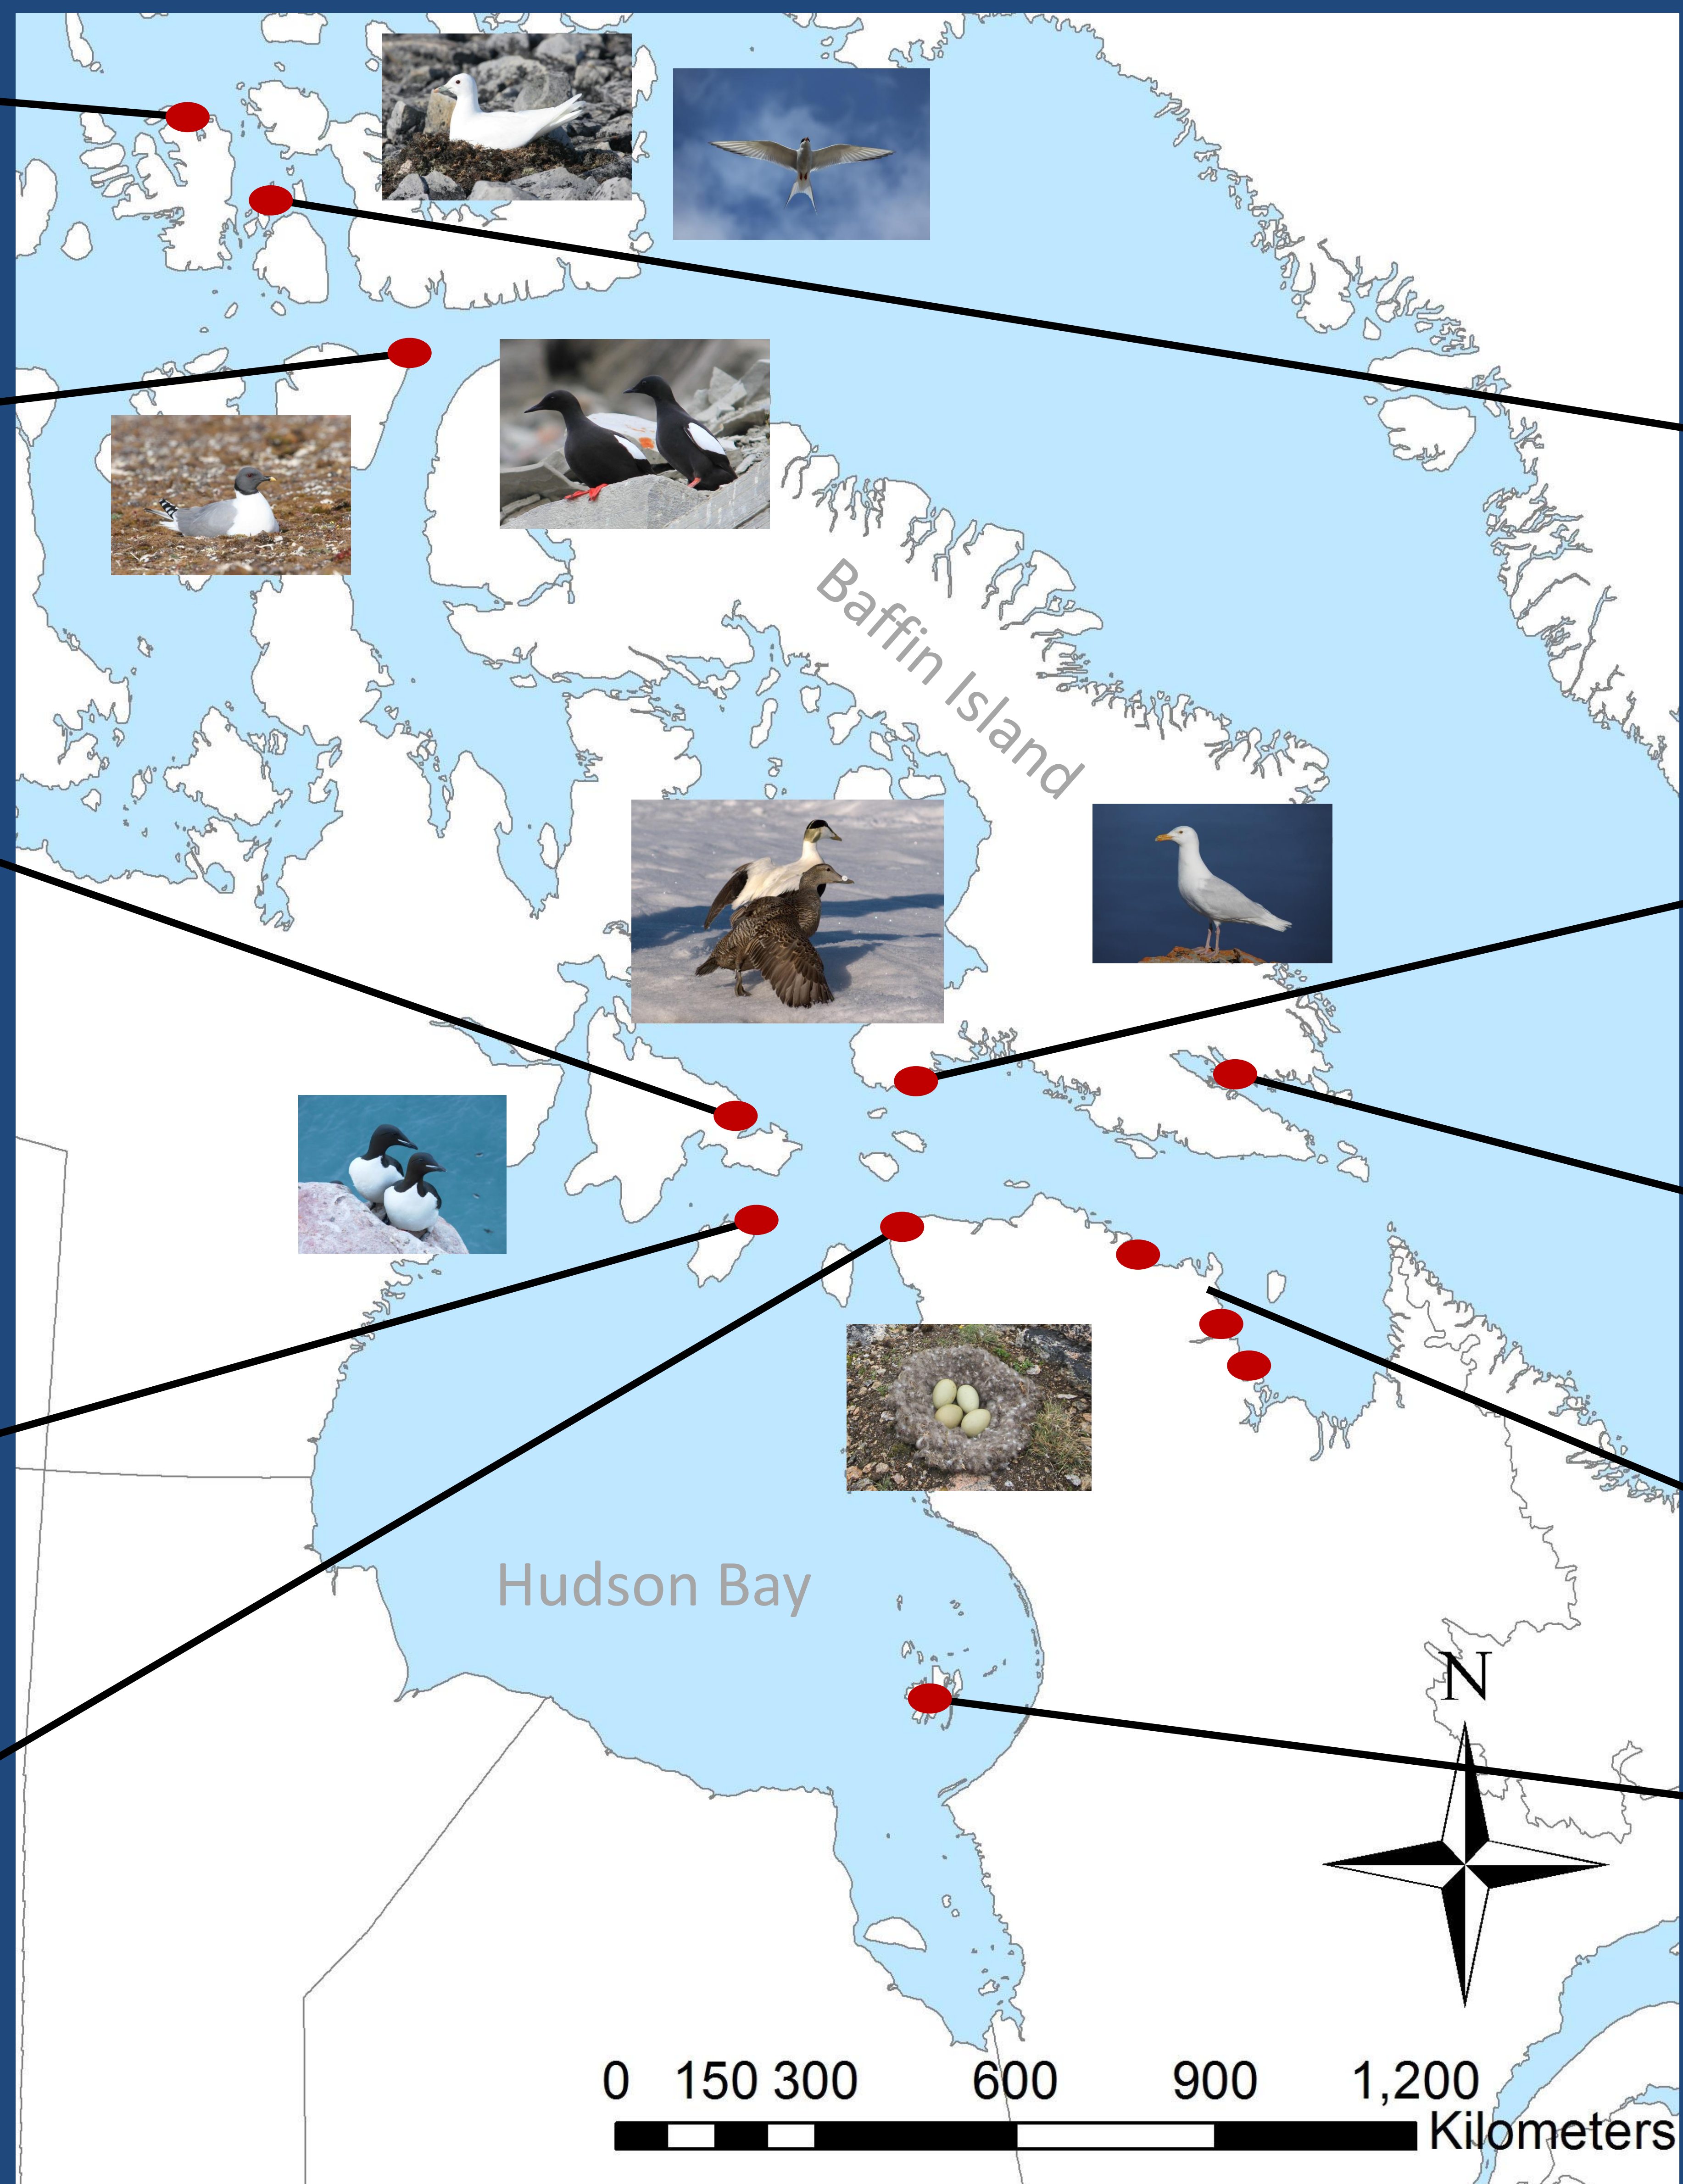

Seymour Island:
 -Ivory gull population studies
 -Long distance ivory gull movements

Prince Leopold Island:
 -Murre, kittiwake and fulmar population and diet studies
 -Long term contaminant monitoring
 -Glaucous gull population studies

East Bay:
 -Eider duck population studies
 -Contaminant assessments
 -Parasite studies
 -Long distance and local eider movements
 -Herring gull movement studies
 -Avian disease monitoring
 -Climate change & reproduction success studies

Coats Island:
 -Murre population and diet studies
 -Local murre movements
 -Long term contaminant monitoring
 -Bear predation on bird colonies
 -Glaucous gull populations studies

Digges Sound:
 -Coastal eider duck surveys
 -Murre population and diet studies
 -Local murre movements
 -Contaminant assessments
 -Bear predation on bird colonies
 -Gull surveys

Nasaruvaalik Island:
 -Arctic tern population studies
 -Sabine's gull long distance movements
 -Ross's gull nesting studies
 -Contaminant assessments

Cape Dorset:
 -Coastal eider duck surveys
 -Contaminant assessments
 -Parasite studies
 -Bear predation on bird colonies
 -Gull surveys

Frobisher Bay:
 -Coastal eider duck surveys
 -Avian disease monitoring
 -Bear predation on bird colonies
 -Local ecological knowledge interviews

Ungava Region:
 -Coastal eider duck surveys
 -Avian disease monitoring
 -Bear predation on bird colonies

Belcher Islands:
 -Eider duck feeding studies
 -Contaminant assessments
 -Parasite studies
 -Eider winter habitat
 -Avian disease monitoring
 -Local ecological knowledge interviews
