

The NCP Publications Database & Website

Lynne Howard

Arctic Science and Technology Information System (ASTIS), Arctic Institute of North America, University of Calgary,
2500 University Dr. NW, Calgary, Alberta, T2N 1N4, 403-220-4032, howard@ucalgary.ca

Objective

To improve the accessibility of publications that were wholly or partially funded by the Northern Contaminants Program (NCP).

Progress

We have so far identified **2921** publications resulting from research and communication activities that were funded by the NCP. This includes **1010** papers in the *Synopsis of Research* volumes, **742** journal papers, and **1169** other publications.

As of 3 Sept. 2013, we have obtained, cited, abstracted, and indexed **2885** of the 2921 identified NCP publications to create the NCP Publications Database.

Database records contain information about one or more libraries where the publication is available for **interlibrary loan**.

Publications available on the Web are **hyperlinked**: **707** records have URLs that take you directly to the **PDF** files of the publications.

Of the 738 journal papers in the NCP Database, **572** now have **DOIs** (digital object identifiers). DOIs in the NCP Database are hyperlinked. Clicking on the DOI will take you to the publisher's website and, if your organization has a subscription, to a PDF file of the paper.

You can help

To make the NCP Publications Database as complete as possible, ASTIS requests that all NCP-funded researchers report their publications to us at the address above.

NCP Publications Database records are included in other polar databases

We are making our NCP records available in other widely-used polar databases, including the main Arctic Science and Technology Information System (**ASTIS**) database, the **IPY** Publications Database and **ASTIS subset databases** such as the Yukon Biodiversity Database, the Inuvialuit Settlement Region Database, the Nunavut Database, and the Nunavik Bibliography.

Publications included in the database

- books and reports
- chapters within books or reports
- journal papers
- conference papers and abstracts
- theses
- pamphlets
- newsletters and newsletter articles
- CD-ROMs
- audio CDs
- videocassettes
- websites

The NCP Publications Database may be searched by:

- words in the title or abstract
- broad subject area
- contaminant
- plant or animal
- geographic region
- community
- author
- publication type
- year
